WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Legs: four 40 x 40 x 4 angle, 702 mm, one at each corner.

Frames: two squares of 40 x 40 x 4 angle, 780 x 780 mm outside, one under each shelf, horizontal leg flat under the plywood; weld the legs inside the corners.

Pot shelf: 18 mm plywood 780 x 780 mm, top 720 mm up; four 316 mm holes at 390 mm pitch (195 mm in from each edge). The pot rims (345 mm) rest on it; the pots hang through.

Bucket shelf: 18 mm plywood, top 120 mm up, notched round the legs.

Buckets: 20 L, 300 mm dia, no more than 330 mm tall, so they clear the hanging pots by 35 mm.

Seal the plywood; stand the rack level on a drained floor.

Check: a 345 mm rim bears at least 14 mm all round each hole.
