DOCUMENT CONTROL

Document ID	PPR-REG-001	Version	0.2
Status	Draft	Date	2026-10-23
Author	Amish Chadha	License	CERN-OHL-S-2.0
Project TRL	TRL 3 Proof of concept		
Repository	github.com/BoujeeEnjinia1701/potpress		
Source	docs/07-regulatory.md @ 75fe8c1		

REVISION HISTORY

Version	Date	Author	Change
0.2	2026-10-23	Amish Chadha	EN 601, ASTM C326, DIN 580 and EN 1005-3 added with the STEM check fixes (PPR-DDR-006)
0.1	2026-10-23	Amish Chadha	First register (kit 1.8 upgrade); sources checked 2026-10-23

PotPress regulatory and standards register

PotPress is workshop machinery that makes a drinking-water product, so two sets of rules matter: machine safety for the press, and product evaluation for the filters, which belongs to the factory. This register is not legal advice; anything marked "to assess" needs a qualified reviewer before any product claim. Method: STANDARDS section 23. Sources checked 2026-10-23.

Table 1. Regulatory and standards register.

#	Standard or regulation	Jurisdiction	What it covers	Applicability to this design	Owner (role)	Status
G1	ISO 12100:2010, risk assessment and risk reduction	International	General principles of machine safety design	The hazard analysis in PPR-RSK-001 follows its method	Design lead	Applies; first pass in PPR-RSK-001
G2	ISO 13857:2019, safety distances	International	Reach through and over guards by upper and lower limbs	Fixed mesh guards and front gate (PR-009)	Design lead; competent person signs	Met by design for Table 4 (PPR-CAL-001, section 15); Table 7 and the floor gap to assess (STEM E3); signature is a hold point
G3	ISO 14119:2024, interlocking devices with guards	International	Design and choice of guard interlocks, defeat resistance	Gate interlock on the jack release and the pin-presence interlock (PPR-DDR-003)	Design lead	To assess against the standard's defeat and coding rules
G4	EU Machinery Directive 2006/42/EC, replaced by Machinery Regulation (EU) 2023/1230 from 20 January 2027	European Union	Essential health and safety requirements and CE marking for machinery placed on the EU market	Only if a press is sold or put into service in the EU; the open design itself is not placed on the market	Builder who places it on the market	Does not apply to the open design; certification needed later for any EU sale
G5	National workplace machinery rules in the partner's country	Partner country	Guarding and use of machinery at work	The partner factory's workshop	Partner factory	To assess when a partner is chosen
G6	EN 1993-1-8 and EN 1993-1-9 (bolted joints, fatigue); EN 10025-2 (S275 steel); ISO 898-1 (bolt grades)	Europe and international	Structural design values	Frame checks in PPR-CAL-001	Design lead	Applies; used as design values
G7	WHO International Scheme to Evaluate Household Water Treatment Technologies	International	Performance targets for household water treatment: 3 stars at 4 log bacteria, 5 log viruses, 4 log protozoa; 2 stars at 2, 3 and 2 log	The filters a factory makes, not the press. PotPress makes no microbial claim (STEM B1)	Partner factory	Does not apply to the press; the factory owns any filter claim (PRB, out of scope)
G8	WHO silver in drinking water, provisional	International	Silver in treated water	Silver treatment is the factory's process; the QC	Partner factory	Does not apply to the press; cited

#	Standard or regulation	Jurisdiction	What it covers	Applicability to this design	Owner (role)	Status
	reference value 0.1 mg/L			rack's test water is not for drinking		for the QC rack's safety note
G9	Food-contact material rules for parts touching clay or test water	Partner country	Plastics and metals in contact with drinking-water products	Polyethylene liners and buckets, aluminium molds (PR-012)	Design lead	To assess for the partner country; molds checked against EN 601 (G11)
G11	EN 601, aluminium castings for use in contact with foodstuff (revised 2026)	Europe (used as the reference limit)	Chemical composition limits, including lead and cadmium, for castings that touch food	Mold castings: each melt checked by OES or XRF before pouring (PR-012, PPR-DDR-006)	Foundry; design lead	Applies as the reference; limit values to confirm
G12	ASTM C326, drying and firing shrinkage of ceramic whiteware clays	International (test method)	Test-bar method for linear shrinkage	Partner clay shrinkage before patterns are printed (PR-001, PPR-DDR-006)	Partner factory	Applies as the method
G13	DIN 580 lifting eye bolts; EN 1005-3 recommended force limits for machinery operation	Europe	Eye bolt use and loading; operator force limits	Lifting set (PR-008); pump handle limit (PR-004)	Design lead	Applies; EN 1005-3 assessment of the handle to do
G10	CMWG best practice recommendations for ceramic pot filters (2011)	International (voluntary)	Factory practice, including filter size, flow testing and QC records	QC rack and flow band (PR-006)	Partner factory	Applies as guidance

Status: to assess, applies, does not apply, met by design, certification needed later.
